EDUCATION

ITMO University

2-nd year Bachelor of Applied Mathematics and Computer Science

Sept. 2020 – Present

St.Petersburg, RU

- **Coursework:** Algorithms and Data Structures, Discrete Math, C++ Advanced, Java

EXPERIENCE

Itiviti

Intern Software Engineer

Aug. 2021 – Sept. 2021

St.Petersburg, RU

- Decreased **by 5 times** the running time of the client's data parser (merged into prod.)
- Designed **UNIT Tests** for this utility by using **GoogleTest framework** (merged into prod.)

PROJECTS

Archiver

- Program is a **console application** developed on **C99**
- Implemented a **Huffman coding** method which reduces the file size by about **8 times**
- Formulated a working **interface**

Shared Pointer

- Smart pointer in **C++11** that retains shared ownership of an object through a pointer. **Several** pointers objects **may own the same** object.
- Engineered support of **custom deleter** and logic of **strong and weak** references

Variant

- The Variant is **type-safe**: union. An instance of variant at any given time either has the value of one of its alternative types, or, on error, has no value.
- Execution meets all requirements standard and done on **C++20** (Concepts, Three-way comparison)

Expression parser

- Designed console application implemented in **Java** with **Generics** to parse arithmetic expressions using **recursive descent method**
- Added **5 base operations** and the **ability to easily add** arithmetic operations

SKILLS

Languages : C, C++, Java, Python, JavaScript

Tools : Git, Jira, Qt, GitHub, MinGW, GCC, CMake
